

MODI project reaches its first year!

MODI: A leap towards SAE L4 automated driving features

This month, MODI is celebrating the first year of activities towards the ambitious goal of contributing to the adoption of highly automated solutions to improve European logistic chains.

MODI project will pave the way for the mass adoption of highly automated freight vehicles through demonstrations, and by resolving barriers to the rollout of automated transport systems and solutions.

MODI annual meeting and General Assembly meeting

The whole consortium gathered for the 1st annual meeting on 24th April, which took place online. After an overview of the project status by the project coordinator, Dr. Ragnhild Wahl, each use case representative and work package leader provided a detailed progress report for the first six months of the project execution and a forecast of the main actions and milestones ahead. Vehicle providers and OEMs provided their perspective on the work accomplished so far and the feasibility of implementing CCAM solutions to improve logistic operations through MODI use cases.

MODI, among the game changers at ITS Europe 2023

The MODI delegation actively participated in the 15th ITS European Congress entitled 'ITS: The Game Changer' in Lisbon, Portugal. The Congress's principal theme "ITS: The Game Changer" was chosen to illustrate the powerful role Intelligent Transport Systems, digitalisation, and cooperative, connected and automated mobility can play in addressing the key challenges in the mobility and transport sectors.
