

# Paving the way for impact!

## MODI: A leap towards SAE L4 automated driving features

MODI accelerates the introduction of highly automated solutions to improve European logistic chains.

Newsletter no. 3 covers the initial stage of 'Paving the way for impact' dissemination phase. In this six-month period, project partners have focused on further defining the use cases, developing the evaluation framework, and preparing for the showcase of vehicles and PDI optimisation.

# MODI Makes Progress: Data Collection and First Trip Completed on Rotterdam-Oslo CCAM Corridor

The MODI project has achieved a significant milestone with the first trip and successful completion of data collection along the CCAM test corridor from Rotterdam to Oslo and back. This is a major step forward in assessing the corridor's readiness for automated driving at SAE Level 4.

## **A large MODI delegation actively participated in the 7th edition of the #RTR2024 in Brussels!**

A large MODI delegation actively participated in the 7th edition of the #RTR2024 conference organised by the European Commission, CCAM Association, ERTRAC – European Road Transport Research Advisory Council, and 2Zero in Brussels.

This unique conference served as a gateway to EU-funded road transport projects, providing valuable insights into the achievements of Horizon projects and their expected impacts. Participants learned about the next research steps in crucial areas of road transport, including Green Vehicles, urban mobility, Logistics, Intelligent Transport Systems, Safety, and Automated Road Transport.

SAE L4 AUTOMATED  
DRIVING FEATURES

# Navigating the Future: MODI sets the starting point for highly automated freight vehicles with the reference drive in Hamburg

Hamburg experienced a milestone reference drive, featuring a production series truck outfitted with high-precision measuring devices. The reference drive assessed for the first time the vehicle's performance under actual conditions in combination with the readiness of the infrastructure for supporting highly automated driving.

## Reflecting on the Success of MODI Project's #CCAM Workshop at Smart City

# Expo World Congress

It's with great pride that we look back on the success of the MODI Project's #CCAM workshop, held on November 9th at the Smart City Expo World Congress in Barcelona. Demonstrating our commitment to driving progress in Connected, Cooperative, and Automated Mobility (#CCAM) technology and services, the event brought together more than 30 influential stakeholders, use case owners, and collaborative projects in a collective effort to overcome barriers and promote the efficient deployment of CCAM technologies and logistic services.
